The

DANICO

*Catalogue of
Electrical Accessories*

Welcome to the Danico Catalogue of Electrical Accessories

We are an independent family-owned company established in 1979 with three generations of experience in Architectural Ironmongery, Electrical Accessories and Bathroom Accessories. Our

showroom and head office is based in Swiss Cottage, North London. We are able to advise and supply a comprehensive range of the above products, offering you the widest possible choice of high quality, value for money products.

Our clients include discerning homeowners, architects, builders, interior designers, hotels and corporations who are building new properties or refurbishing existing homes. We can supply any product anywhere in the world.

In this 68 page Electrical Accessory catalogue most designs have been photographed actual size, to help you first select the plate design and finish, and then prepare a schedule of the individual components required from the full listing. A key to the abbreviated finish codes is shown on the contents page opposite. It has only been possible to show the majority of our standard range of products. Other items, and special finishes, are available to order. We also have the facilities to manufacture "special" items, made to client's specifications and designs.

All our electrical products comply with the applicable British Standard specification and should only be installed by a suitably qualified electrician, in accordance with the requirements of relevant legislation, and the accepted practice in the industry.

On the last two pages we show a small selection of Decorative Grilles, Jado Bathroom Accessories and Architectural Ironmongery. Separate catalogues and full information is available on request.

Our experienced and friendly staff will be delighted to welcome you to our showroom or to help and advise you on the telephone, via fax or email. We hope you find our catalogue informative and easy to use.

Rahul, Rishi, Annelise and Ashok Daryanani
